

If you have not provided us with your desired username and password do this step first so we can turn on your app. Go to <https://medictv.club/thank-you> and submit the form.

Firestick Settings.

1. Go to "settings" on your Fire TV or stick.
2. Scroll to "Device" then select "Developer options".
3. Turn ADB debugging to ON and Apps from unknown sources to ON.

We recommend using an app called "Downloader" (free on the Fire TV Appstore). To download this app, simply press the microphone button on your Fire TV remote and say "Downloader".

If you do not have the microphone button on your Fire TV remote, simply go into the search section and type in "Downloader". Click "install". After installation is complete, open it. Using the built-in browser within the app,

Navigate to <http://bit.ly/medictv> Once in your account click on the button that says "Download APK". This will install MedicTV on your Fire TV.

Exit "Downloader" and navigate to settings, applications, manage installed applications. You will see MedicTV installed. Open the app and enter your username and password you provided us and begin watching!
